Eliminate Your Security Blind Spots: You Can't Secure What You Can't See

More than 80% of all web traffic is now encrypted. Sophisticated attackers know this and have shifted their tactics to hide malware within encrypted payloads. Learn how to protect the investment you've already made in your security inspection devices by visiting our website HERE

TOP STORIES

OpenGov Adds Katherine August-deWilde to Board of Directors

After the addition of two advisers and a new president in March, the company's fourth high-level appointment in 2019 gives it an experienced boards of directors, with several co-founders and partners of major businesses. READ MORE

Motorola Solutions Buys Body Cam Maker, Consolidating Market

The buyout of WatchGuard brings Motorola Solutions into some of

the largest police departments in the country, simultaneously creating a potential path for facial recognition to those departments. READ MORE

Autonomous Delivery Robots Find Place in Michigan Bike Lanes
A company in Ann Arbor, Mich., is testing the hypothesis that full-sized autonomous vehicles are not the answer to making short-distance food or grocery deliveries, and is instead betting on small electric vehicles. READ MORE

Another Look at Global Insider Cybersecurity Threats
Details from recent data breaches as well as results from several security industry studies raise new (and old) questions about insider threats within organizations. What can be done? Let's explore. READ MORE

QUESTION OF THE DAY

How much is Equifax being fined for the 2017 data breach?
ANSWER
